From the Editorial's Desk

In today's dynamic regulatory environment, success is defined not just by approvals, but by the ability to consistently deliver precision, reliability, and scientific excellence. As the industry continues to evolve, the importance of high-quality regulatory data and structured documentation has become more critical than ever.

This edition of our newsletter captures the outcomes of the **474th Registration Committee meeting held on 30.07.2026**, bringing together the approved and satisfactory cases across every registration category, along with the policy developments that will shape the coming quarter for the agrochemical and bio-pesticide industry.

The meeting recorded one of the strongest formulation cycles of the year, with **955 applications under Section 9(4) FIM** scrutinised and found satisfactory, and **98 bio-pesticide applications under Section 9(3)** approved for already registered strains. On the import side, **35 technical import cases under Section 9(4) TI** were cleared, while three technical indigenous manufacture cases were approved under Section 9(4) TIM.

Key Regulatory Developments – 474th RC

Glyphosate: The RC decided that the use of Glyphosate should be restricted and carried out through trained personnel / Pest Control Operators, to avoid occupational hazards and prevent misuse. The decision has been communicated to DA&FW for a final view.

Import Permits: Following the Gazette Notification dated 08.07.2026 (Insecticides Third Amendment Rules, 2026), an import permit is now a statutory requirement for import of scheduled substances for non-insecticidal use. All applications must henceforth be filed in the prescribed Form.

These outcomes reflect a deeper capability – managing complex regulatory pathways, generating robust stability and efficacy data, and aligning with stringent and evolving guidelines. It is this capability that enables consistent and timely approvals.

At JDR, we believe that true leadership lies in setting benchmarks – through accuracy, attention to detail, and scientific rigor. As we move ahead, our focus remains on driving regulatory excellence, supporting our partners, and contributing to the advancement of the industry at large.

Chemical Cases under 9(3) TI, TIM, FI, FIM

In the 9(3) segment the Registration Committee approved four cases in this meeting – three formulations for indigenous manufacture (FIM) and one formulation import (FI). A number of other 9(3) applications were rejected or held back for clarification on purity, source address and toxicological equivalence, reflecting continued strict regulatory scrutiny.

S.No.	Product Name	Company Name	Target Crop	Target Disease/Insect	Category
1	Flubendiamide 5.75% + Etmectin Benzoate 1.92% ME	Nichino India Pvt. Ltd.	Maize, Soybean	Fall armyworm (Spodoptera frugiperda), Stem borer (Chilo partellus); Stem fly (Melanagromyza sojae), Semi looper (Chrysodeixis acuta), Pod borer (Helicoverpa armigera)	FIM
2	Azoxystrobin 5% + Isoprothiolane 18% + Validamycin 3.5% WDG	Krishi Rasayan Exports Pvt. Ltd.	Paddy (Rice)	Rice blast (Pyricularia oryzae), Sheath blight (Rhizoctonia solani)	FIM
3	Ethiprole 16.95% w/w + Benzpyrimoxan 25.42% w/w SC	Bayer CropScience Ltd.	Rice	Brown plant hopper (Nilaparvata lugens), White backed plant hopper (Sogatella furcifera), Green leaf hopper (Nephotettix virescens)	FIM
4	Ipconazole 40.70% w/w FS	UPL Limited	—	—	FI

Chemical Cases under 9(4) TI, FI

The 9(4) TI segment reflects a complete approval trend, with all 35 applications granted registration, indicating strong regulatory support for technical imports. All approved sources are Chinese manufacturers, highlighting continued dependence on global supply chains for key active ingredients. The data also shows multiple companies importing the same molecules – notably Glyphosate, Abamectin, Azoxystrobin and Cartap Hydrochloride – ensuring wider availability in the domestic market. No case was approved under 9(4) FI in this meeting. All approvals are subject to submission of the verified manufacturing address of the overseas source along with geo-tagging evidence.

Chemical Cases under 9(4) TIM

The 9(4) TIM segment was a compact one this cycle, with three applications for technical indigenous manufacture placed before the Committee and all three approved – covering two herbicide actives (Pendimethalin and Propaquizafop) and one pyrethroid insecticide (Bifenthrin). Separately, applications for Dimethomorph Technical and Metolachlor Technical were held for clarification from CIL and the applicants, and are expected to be taken up in a subsequent meeting.

S.No.	Product Name	Company Name
1	Pendimethalin Technical 90.00% w/w Min.	Indus Finechem LLP
2	Propaquizafop Technical 91.00% w/w Min.	Willowood Industries Pvt. Ltd.
3	Bifenthrin Technical 92.00% w/w Min.	Ralph Agro Rasayan Pvt. Ltd.

Chemical Cases under 9(3) Biopesticides

The Registration Committee approved 98 applications of already registered strains of bio-pesticides under Section 9(3), with every case recorded as satisfactory. Registrations are concentrated around a few key microbial products, with *Verticillium lecanii* 1.5% AS leading, followed by *Metarhizium anisopliae* 1.5% AS and *Trichoderma viride* 1.5% AS. Aqueous suspension (AS) formulations dominate this cycle. The trend highlights the increasing industry focus on bio-based crop protection solutions, particularly fungi and bacteria-based products aimed at sustainable agriculture and soil health management.

Top Most Registered Biopesticides

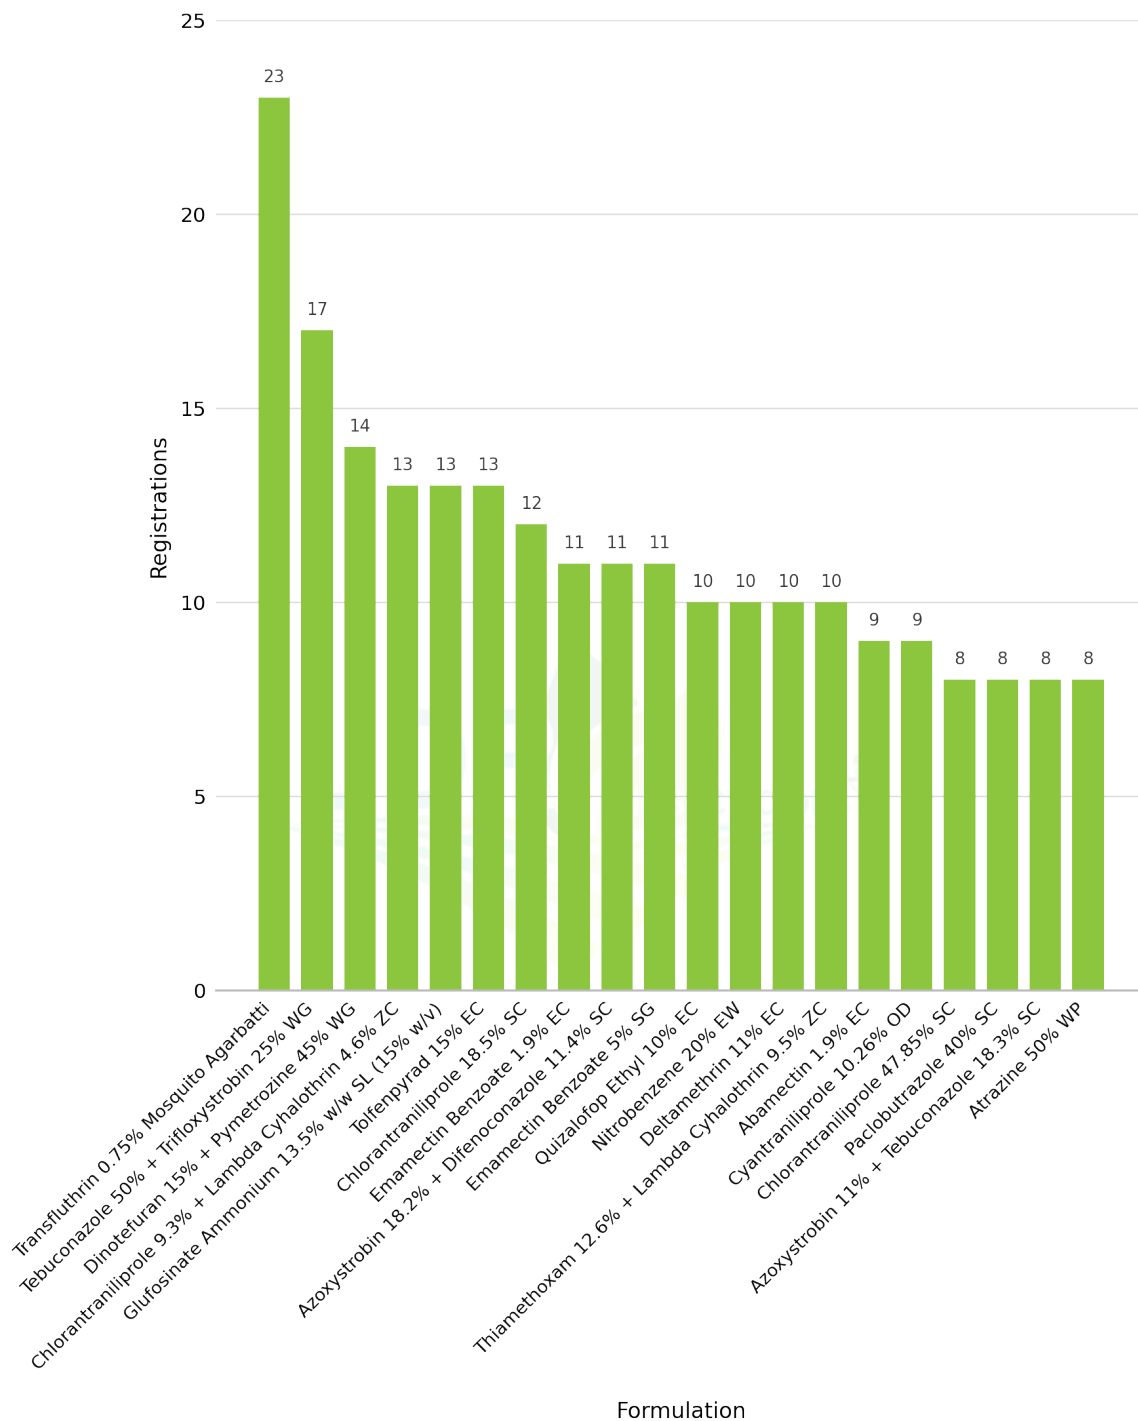

Chemical Cases under 9(4) FIM

A total of 955 applications were received online for grant of registration under Formulation Indigenous Manufacture (FIM), Section 9(4); all 955 were scrutinised and found satisfactory. Household insecticide formats lead the cycle, with Transfluthrin 0.75% Mosquito Agarbatti recording the highest number of registrations, followed by combination fungicides such as Tebuconazole 50% + Trifloxystrobin 25% WG and broad-spectrum insecticide combinations, indicating strong market demand for high-efficacy and multi-target products. The table below lists the top 20 most registered formulations of this meeting.

S.No.	Formulation	Registrations
1	Transfluthrin 0.75% Mosquito Agarbatti	23
2	Tebuconazole 50% + Trifloxystrobin 25% WG	17
3	Dinotefuran 15% + Pymetrozine 45% WG	14
4	Chlorantraniliprole 9.3% + Lambda Cyhalothrin 4.6% ZC	13
5	Glufosinate Ammonium 13.5% w/w SL (15% w/v)	13
6	Tolfenpyrad 15% EC	13
7	Chlorantraniliprole 18.5% SC	12
8	Emamectin Benzoate 1.9% EC	11
9	Azoxystrobin 18.2% + Difenconazole 11.4% SC	11
10	Emamectin Benzoate 5% SG	11
11	Quizalofop Ethyl 10% EC	10
12	Nitrobenzene 20% EW	10
13	Deltamethrin 11% EC	10
14	Thiamethoxam 12.6% + Lambda Cyhalothrin 9.5% ZC	10
15	Abamectin 1.9% EC	9
16	Cyantraniliprole 10.26% OD	9
17	Chlorantraniliprole 47.85% SC	8
18	Paclobutrazole 40% SC	8
19	Azoxystrobin 11% + Tebuconazole 18.3% SC	8
20	Atrazine 50% WP	8

Top 20 Most Registered 9(4) FIM Products

Our Services

Agrochemical Registration under CIB&RC

- Registration of Technical and Formulation for Import (TI & FI)
- Registration of Technical and Formulation for Manufacturing in India (TIM & FIM)
- Registration of Bio-pesticides
- Label Claim, Changes in Packaging, Shelf-Life Enhancement
- Permit for Research Test and Trial (RTT Permit)
- Free Sale Certificate for Export
- Endorsement Cases – Change in Factory and office Address
- Change in Company Name and Transfer of Certificates
- Registration for Export and Import for Export

Bio-stimulant Registration under FCO

Permanent Registration of Bio-Stimulants

Assistance in Data Generation

- Chemistry Data, Bio-Efficacy Trials, Shelf Life Data
- Toxicity Reports (Acute, Ecotox etc)
- Heavy Metal Analysis Report, Pesticide Analysis

Data Gap Analysis Services

Import Permit for Non-Insecticidal use under CIB&RC

Registration of Boric Acid/ Non-Boric Acid

- Import permit of Boric Acid/Non Boric Acid
- Change of Source Name in Import Permit
- Addition of Manufacturer/Shipper in the Import Permit

Registration of Biocides

- Import Permit of Biocides
- Indigenous Manufacturing of Biocides
