04	Chemical Cases under 9(3) Biopesticides	8-13
05	Chemical Cases under 9(4) FIM	14-15

From the Editorial's Desk

In today's dynamic regulatory environment, success is defined not just by approvals, but by the ability to consistently deliver precision, reliability, and scientific excellence. As the industry continues to evolve, the importance of high-quality regulatory data and structured documentation has become more critical than ever.

This edition of our newsletter captures the outcomes of the **472nd Registration Committee meeting held on 26.05.2026**, bringing together the approved and satisfactory cases across every registration category, along with the policy developments that will shape the coming quarter for the agrochemical and bio-pesticide industry.

The meeting was a strong one for bio-pesticides, with **119 cases approved under Section 9(3)** – 51 considered individually and 68 through annexures – the largest bio-pesticide cycle of the year. On the formulation side, **1,456 applications under Section 9(4) FIM** were scrutinised and found satisfactory. The technical segment saw **31 approvals under Section 9(4) TIM** and **19 technical import cases under Section 9(4) TI**, while **18 cases under Section 9(3)** secured registration, including several first-in-country molecules such as Dicloromezotiaz, Pyrifluquinazon and Sulfoxaflor combinations.

Key Regulatory Developments – 472nd RC

Compiled guidelines approved: The RC approved the compilation of all guidelines approved across its earlier meetings, along with specific conditions, and directed the Secretariat of CIB&RC to issue a public notice inviting stakeholder comments within 30 days. The RC also made it clear that **data generation for bio-pesticides and botanicals shall be accepted only from NABL-approved laboratories.**

Scrutiny templates made mandatory: After incorporating stakeholder comments received through the public notice dated 12.02.2026 and meetings held on 06.03.2026 and 08.05.2026, the RC finalised and approved the revised scrutiny templates. These will form an integral part of the guidelines on the CROP portal, and once incorporated, no application will be accepted without the information filled in the respective templates across all disciplines.

These outcomes reflect a deeper capability – managing complex regulatory pathways, generating robust stability and efficacy data, and aligning with stringent and evolving guidelines. It is this capability that enables consistent and timely approvals.

At JDR, we believe that true leadership lies in setting benchmarks – through accuracy, attention to detail, and scientific rigor. As we move ahead, our focus remains on driving regulatory excellence, supporting our partners, and contributing to the advancement of the industry at large.

Chemical Cases under 9(3) TI, TIM, FI, FIM

The 9(3) segment was the innovation highlight of this meeting, with eighteen cases approved – nine formulations for indigenous manufacture (FIM), five technicals for indigenous manufacture (TIM), three technical imports (TI) and one formulation import (FI). Several first-in-country molecules secured registration, including Dicloromezotiaz, Pyrifluquinazon and Sulfoxaflor-based combinations. The application for Haloxypop-p-Methyl Technical was held for clarification on nomenclature, and Chlorothalonil Technical 98.50% was rejected as the source of manufacture did not exist on the ICAMA website – reflecting continued strict regulatory scrutiny.

S.No.	Product Name	Company Name	Target Crop	Target Disease/Insect/Weed	Category

18	Bentazone Technical 97.00% w/w Min. (New Source)	Willowood Chemicals Ltd.	—	—	TI

Chemical Cases under 9(4) TI, FI

The 9(4) TI segment reflects a complete approval trend, with all 19 applications granted registration, indicating strong regulatory support for technical imports. Every approved source is a Chinese manufacturer, highlighting continued dependence on global supply chains for key active ingredients. Repeat molecules — notably Imidacloprid, Glyphosate, Glufosinate Ammonium, Emamectin Benzoate, Azoxystrobin and Pymetrozine — were imported by several companies, ensuring wider availability in the domestic market. No case was approved under 9(4) FI in this meeting. All approvals are subject to submission of the original consent letter, ICAMA certificate and geo-tagging documents from the source.

Chemical Cases under 9(4) TIM

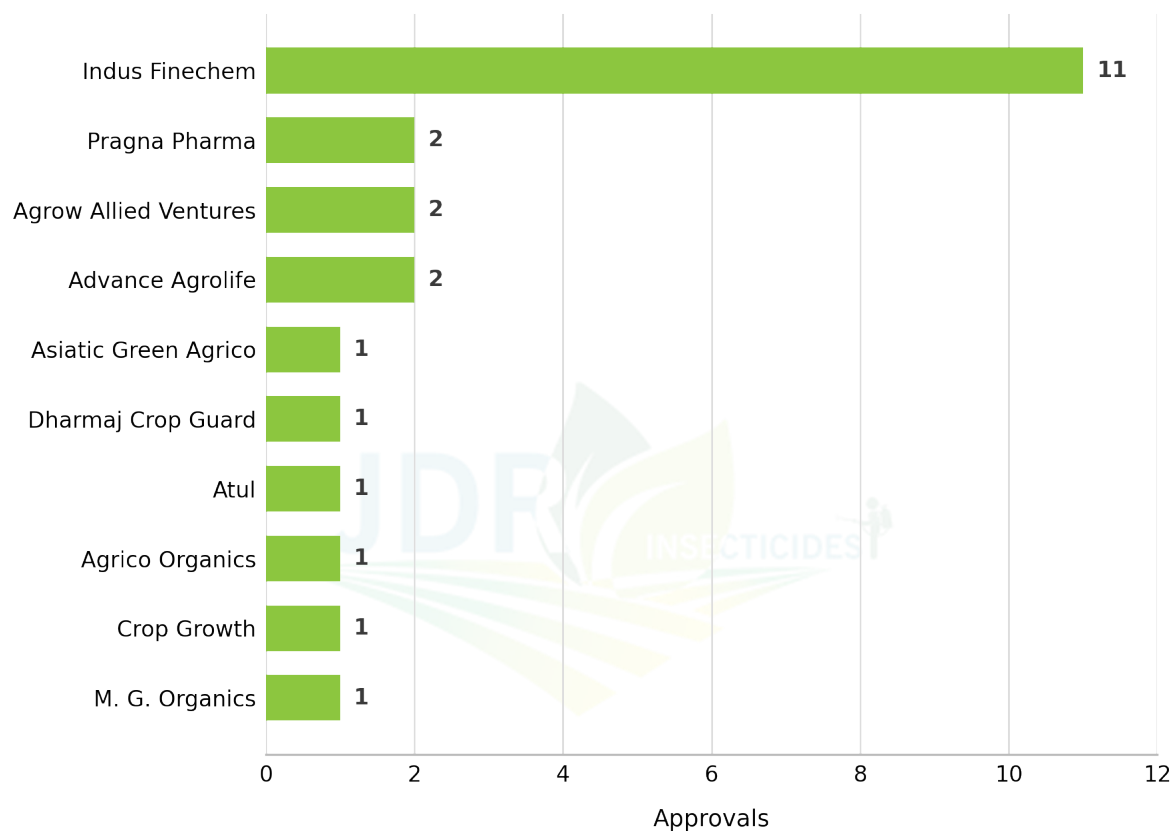

Thirty-two applications for technical indigenous manufacture were placed before the Committee and 31 were approved; the application for Pendimethalin Technical from M/s Moti Insecticides Pvt. Ltd. was rejected on account of higher impurity reported in the ATR of CIL. The list spans herbicides, fungicides and insecticides, with repeated entries for Chlorantraniliprole, Cyantraniliprole, Pendimethalin and Pretilachlor. A single applicant, M/s Indus Finechem LLP, accounted for eleven of the thirty-one approvals – a striking concentration that signals an aggressive push into domestic manufacture of off-patent actives.

Top Companies by 9(4) TIM Approvals

Chemical Cases under 9(3) Biopesticides

The bio-pesticide segment was the largest of the year, with 119 cases of already registered strains approved under Section 9(3) – 51 considered individually as agenda items 6.1 to 6.51 and 68 more through Annexure-6.52.1 and Annexure-6.73.1, every one of them recorded as satisfactory. Registrations are concentrated around a few key microbial products, with *Bacillus subtilis* 1.5% AS leading clearly, followed by *Beauveria bassiana* 1.5% AS and *Trichoderma harzianum* 1.5% AS. Aqueous suspension (AS) formulations dominate this cycle. The trend highlights the increasing industry focus on bio-based crop protection solutions, particularly bacteria and fungi-based products aimed at sustainable agriculture and soil health management.

Chemical Cases under 9(4) FIM

A total of 1,456 applications were received online for grant of registration under Formulation Indigenous Manufacture (FIM), Section 9(4); all 1,456 were scrutinised and found satisfactory. Chlorantraniliprole 47.85% SC records the highest number of registrations, followed by the herbicide Topramezone 336 g/L SC and by combination fungicides such as Azoxystrobin 18.2% + Difenconazole 11.4% SC. Chlorantraniliprole-based formulations appear repeatedly across the top ranks, and plant growth regulators including Paclobutrazole and Gibberellic Acid combinations feature strongly. The pattern indicates sustained market demand for high-efficacy, broad-spectrum and multi-target products. The table below lists the top 20 most registered formulations of this meeting.

S.No.	Formulation	Registrations
1	Chlorantraniliprole 47.85% SC	18
2	Topramezone 336 g/L (w/v) SC	17
3	Azoxystrobin 18.2% + Difenconazole 11.4% SC	15
4	Dinotefuran 15% + Pymetrozine 45% WG	15
5	Paclobutrazole 40% SC	14
6	Tebuconazole 50% + Trifloxystrobin 25% WG	14
7	Glufosinate Ammonium 13.5% w/w SL (15% w/v)	14
8	Tembotrione 34.4% SC	14
9	Nitenpyram 25% SP	13
10	Chlorantraniliprole 18.5% SC	13
11	Mesotrione 2.27% + Atrazine 22.7% SC	13
12	Tolfenpyrad 15% EC	13
13	Gibberellic Acid 1.8% + 6-Benzylaminopurine 1.8% L	13
14	Nitrobenzene 20% EW	12
15	Chlorantraniliprole 0.4% GR	12
16	Abamectin 1.9% EC	11
17	Lufenuron 5.4% EC	11
18	Azoxystrobin 2.5% + Thiophanate Methyl 11.25% + Thiamethoxam 25% FS	11
19	Paraquat Dichloride 24% SL	11
20	Profenofos 40% + Cypermethrin 4% EC	11

Top 20 Most Registered 9(4) FIM Products

Our Services

Agrochemical Registration under CIB&RC

- Registration of Technical and Formulation for Import (TI & FI)
- Registration of Technical and Formulation for Manufacturing in India (TIM & FIM)
- Registration of Bio-pesticides
- Label Claim, Changes in Packaging, Shelf-Life Enhancement
- Permit for Research Test and Trial (RTT Permit)
- Free Sale Certificate for Export
- Endorsement Cases – Change in Factory and office Address
- Change in Company Name and Transfer of Certificates
- Registration for Export and Import for Export

Bio-stimulant Registration under FCO

Permanent Registration of Bio-Stimulants

Assistance in Data Generation

- Chemistry Data, Bio-Efficacy Trials, Shelf Life Data
- Toxicity Reports (Acute, Ecotox etc)
- Heavy Metal Analysis Report, Pesticide Analysis

Data Gap Analysis Services

Import Permit for Non-Insecticidal use under CIB&RC

Registration of Boric Acid/ Non-Boric Acid

- Import permit of Boric Acid/Non Boric Acid
- Change of Source Name in Import Permit
- Addition of Manufacturer/Shipper in the Import Permit

Registration of Biocides

- Import Permit of Biocides
- Indigenous Manufacturing of Biocides
